

PROFILE SUMMARY

I am an artificial intelligence major pursuing a Bachelor of Technology at the Institute of Advanced Research. I am driven and meticulous. I have a solid background in programming, am an expert in Python and related technologies, and I have a strong interest in machine learning and artificial intelligence. I have been able to effectively connect my theoretical knowledge with practical applications through practical project experience.

SKILLS

- PostgreSQL, Power BI, Python
- GUI/UI, CSS
- Microsoft Excel, MS Word, MS PowerPoint
- Django, Flask, NLP
- JavaScript, HTML, GitHub
- Machine Learning, Artificial Intelligence
- TensorFlow, Scikit-learn

EDUCATION

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE WITH MAJOR IN ARTIFICIAL INTELLIGENCE. *Institute of Advanced Research.* **2022–present**

PROJECTS

- **College Management System**
 - Developed a **full-scale web application** to automate college administrative tasks using **HTML, CSS, JavaScript, and PHP/Node.js (backend)**.
 - **Features:**
 - * **Student & Faculty Portal:** Login, profile management, and dashboard.
 - * **Attendance Tracking:** Real-time marking and reporting system.
 - * **Grade Management:** Secure submission and viewing of grades.
 - * **Admin Panel:** User management, course scheduling, and analytics.
- **Python Projects**
 - **Static Quiz Application using Tkinter:**
 - * Created a user-friendly quiz interface using the **Tkinter** GUI library.
 - * Implemented multiple choice questions, score calculation, and user interaction through buttons and labels.
 - * We emphasize simplicity, usability, and error handling.
 - **Social Media Analytical Tool:**
 - * Extracted and analyzed social media data using platform APIs (e.g., Twitter).
 - * Performed sentiment analysis using **TextBlob** and **NLTK** libraries.
 - * Visualized keyword trends and user engagement with **matplotlib/seaborn**.
 - **Stock Market Monitoring Tool using yfinance:**
 - * Utilized the **yfinance** module to fetch and analyze historical stock data.
 - * Incorporated technical indicators such as moving averages and RSI.
 - * Enabled time-range queries and data visualization for market trend analysis.
 - **AI Voice Assistant:**
 - * Developed a voice-controlled assistant using **SpeechRecognition** and **pyttsx3**.
 - * Supported tasks such as weather updates, telling time, launching websites, and more.
 - * Demonstrated real-time voice processing and automation capabilities.

EXPERIENCE

- **Summer Intern – Python Web Development** May 2025 – August 2025
 - * **Organization:** Bhaskaracharya Institute For Space Applications and Geo-Informatics (BISAG).
