## SUMMARY

---

I am a dedicated student currently pursuing a Bachelor of Technology at the Institute of Advanced Research, specializing in Artificial Intelligence. I have developed strong programming skills in Python and related technologies, and I am particularly interested in AI and ML. With hands-on experience in various projects, I have effectively applied theoretical concepts to practical solutions. I am passionate about continuous learning and contributing to innovative technical solutions.

## TECHNICAL SKILLS

---

|                   |                                                            |
|-------------------|------------------------------------------------------------|
| <b>Languages</b>  | : JavaScript, PHP, Python, HTML, CSS                       |
| <b>Frameworks</b> | : Django, Flask, Tkinter(UI), Scikit-learn, TensorFlow     |
| <b>Libraries</b>  | : Pandas, Numpy, Matplotlib, Seaborn, Pyscopg2, SQLAlchemy |
| <b>Databases</b>  | : Mysql, PostgreSQL                                        |
| <b>Dev Tools</b>  | : Visual Studio Code, Pycharm, Github, PgAdmin, PhpMyAdmin |

## EDUCATION

---

|                                                                                                                         |                                                        |

## EXPERIENCE

---

|                                                                                                           |                                                            |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------|
| <b>Full Stack Developer</b><br><i>Bhaskaracharya Institute For Space Applications and Geo-Informatics</i> | May 2025 – Present<br>Onsite – Gandhinagar, Gujarat, India |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------|

- I am developing a job recommendation system that allows users to upload resumes in PDF or image format. The system uses Optical Character Recognition (OCR) to extract text from the resumes, parses the text for relevant information such as skills and experience, and recommends jobs based on this extracted information.

## PROJECTS

---

### Collage Management System

- \* Developed a responsive and user-friendly college management system for managing student and faculty data using **HTML, CSS, and JavaScript**
- \* Designed web pages to provide a clean and structured user interface layout
- \* Implemented form validations and dynamic features using JavaScript
- \* Enabled role-based access control (admin, faculty, student) for secure operations
- \* Ensured mobile responsiveness and cross-browser compatibility

### Python Projects

- \* Worked on various software development projects using **Python**, focusing on automation, data analysis, and user interaction
- \* Developed a static quiz application using Python **Tkinter** for GUI-based user interaction
- \* Created a social media analytics tool using Python for data parsing and sentiment analysis
- \* Developed an AI-based voice assistant in Python to perform tasks using voice commands and speech recognition
