With a solid foundation in Artificial Intelligence, I am eager to start an entry-level position where I can apply my skills in machine learning, data analysis, and programming. Proficient in Python, TensorFlow, and data manipulation, I am well prepared to tackle real-world AI challenges. My focus is on roles that provide opportunities for hands-on experience and professional growth in developing and implementing AI solutions. I am enthusiastic about collaborating with a dynamic team and contributing to innovative projects, while continuously enhancing my expertise in the field of AI.

EXPERIENCE

Oasis Infobyte

June 2024 – July 2024

Data Analytics Intern

- Performed exploratory data analysis (EDA) on various datasets to uncover trends, patterns, and insights that informed strategic decision-making.
- Carried out data cleaning and preprocessing to maintain data quality and ensure consistency for subsequent analyses.
- Created interactive dashboards and visual reports to communicate analytical findings clearly and effectively.
- Tech Stack:** Python, Pandas, Matplotlib, Power BI

Bharat Intern

May 2024 – June 2024

Machine Learning Intern

- Built and deployed machine learning models aimed at solving real-world challenges, emphasizing predictive analytics and process automation.
- Applied data preprocessing, feature engineering, and hyperparameter optimization techniques to enhance model accuracy and performance.
- Contributed to the development of end-to-end pipelines, integrating models with user-friendly interfaces for seamless deployment.
- Tech Stack:** Python, scikit-learn, TensorFlow, Pandas.

PROJECTS

Project: GPT Travel

- Developed an AI-powered travel planning application called **GPT Travel** using Streamlit, allowing users to input trip details (dates, destination, travel reason) and receive a personalized itinerary.
- Integrated **OpenAI API** to generate intelligent travel suggestions including landmarks, food places, and activities tailored to the user's preferences.
- Incorporated an **interactive map** using Folium and a **print-to-PDF feature** to let users visualize and export their travel plans easily.
- Tech Stack:** Python, Streamlit, OpenAI API, Folium (for map visualization), PDF export features (via browser print)

Project: Iris classification

- Developed and trained machine learning models for **iris flower classification** using Python, scikit-learn, and TensorFlow.
- Performed **data preprocessing**, feature selection, model training, and evaluation to achieve high classification accuracy.
- Visualized model architecture and prediction results using plots to interpret performance and improve model understanding.
- Tech Stack :** Python, scikit-learn, TensorFlow, Pandas, Matplotlib, Seaborn

Project: Movie Recommender

- Built a **movie recommender system** using Python, applying both **collaborative filtering** and **content-based filtering** techniques to generate personalized movie suggestions.
- Implemented machine learning algorithms to analyze user preferences and movie metadata, enhancing recommendation accuracy.
- Demonstrated practical application of AI/ML concepts in a real-world scenario, highlighting strengths in model design, evaluation, and system deployment.
- **Tech Stack:** Python, Pandas, NumPy, scikit-learn, Surprise (for collaborative filtering), Natural Language Processing (TF-IDF), Matplotlib, Seaborn

EDUCATION

Bachelor of Technology: Information Technology(B.Tech)

PRESENT

Institute Of Advanced Research, 6.40 CGPA

Higher Secondary Education (HSC)

2021

IDP, Motera, 60.75%

SKILLS & OTHER

- Python - including libraries like Pandas, NumPy, scikit-learn
- SQL - for data querying and manipulation
- Machine Learning and Deep Learning - model training, evaluation, and optimization
- Data Analysis - EDA, data preprocessing, feature engineering
- Data Visualization - Power BI, Matplotlib, Seaborn
- Git & GitHub - version control, collaborative coding, project management

CERTIFICATIONS

- Advanced Course (Machine Learning, Internet of Things, Deep Learning, Computer Vision and SAP
- Advanced Business Application Programming (ABAP) on Business Technology Platform (BTP)—SAP
- SpaceX Satellite's Orbit Meta-Data Inventive Analysis with AI – Institute of Advanced Research
- Tata Group - Data Visualization: Empowering Business with Effective Insights Job Simulation – Forage
- Big Data Analytics—Great Learning
- Basics Of Machine Learning—Great Learning

Language

- English
- Hindi
- Gujarati
